

## Nissan Qashqai e-Power pre-production prototype

(Temporary numberplates)

### Specification

|                             |  |
|-----------------------------|--|
| Engine                      | 1.5L variable compression ratio, turbo-charged (Petrol motor-charged 100% electric-driven powertrain). Engine output: 154hp<br>No. of cyl./ccm/valves: 3/1497/12 |
| Power Output                | 187hp  |
| Torque                      | 330Nm  |
| Gearbox                     | n/a  |
| Fuel consumption (combined) | n/a  |
| CO <sub>2</sub>             | n/a  |
| Top speed                   |  |
| Acc. 0-100 km/h             | n/a  |
| Weight                      | n/a  |
| Max. Towable mass (braked)  | n/a  |

### The test car is equipped with following items as standard:

n/a

### The test car is equipped with this optional equipment:

n/a

### Lights:

**Frontlights:** n/a

n/a

**Rearlights:** n/a

### Autonomous Emergency Brake System (AEB):

n/a

### Comments:

Ahead of its market introduction, this pre-production prototype is available to give a first impression of the e-Power driving experience that will be available to Nissan Qashqai customers when it joins the range in 2022. The vehicle is not at the final level of production fit and finish, but is close to final dynamic performance.
