

## A lot of power

With 45 chargeable cars the power supply at our test site has faced challenges. But with existing and new infrastructure the organizers have managed to get an impressive amount of power: 200 amps. They are distributed through many low speed chargers/outlets plus a mobile quick charger. The unit from

Finish Kempower (right on picture) can supply up to 37 kW to share for two. Even though there isn't a charger at every parking spot, the charging has gone well so far by moving some EV's to the fast charger for a limited time. So that is why the cars are not always parked in the usual family-places.

## Let's go to the beach!

Monday morning is the time for the traditional beach photo. During breakfast – between 8.30 and 9.00 - we will distribute the keys for the selected cars, and then go to the beach to organize the cars.

We need many volunteers for that operation, so please help us driving a car to the beach. You are all invited to join us for the

picture shooting. It will probably take around an hour and a half. When the big picture is secured, we will keep all the BEVs for another group photo. The pictures will be available to all participants on [www.tannistest.com](http://www.tannistest.com).

Due to the photo session, there will be a limited number of test cars before lunch.

## Weather today

**Hi: 16 - Lo: 14**  
Wind 7-8 m/s SE

Monday will start cloudy, and around noon rain is coming and it might be quite heavy in the afternoon. Moderate winds, though gusting to 14 m/s. Sun up 07.13. Sun down 19.05 High tide: 8.26 + 21.10

## Programme

07.00 – 09.00 Breakfast  
08.30 – 09.00 Distribution of keys and transfer to beach  
09.00 – 11.00 Beach photo  
08.00 – 12.30 Free testing (limited number of cars)
